Thanks for your inquiry about flight training :

Aurora Aviation is a part 61 flight school based at the Aurora Municipal Airport in Aurora, MO. We have been flight training at the Aurora location for over 11 years and provide primary as well as advanced training for instrument or commercial certification.

We are excited about the prospect of teaching you about the fun and enjoyment of general aviation flight for business, pleasure or a future career.

Our location and airport will allow the new pilot to become comfortable with the control of the airplane and use of radio communications before dealing with congested areas such as regional and international airports and traffic.

Our location is convenient to reach, as the airport is located on Hwy 60 just east of Aurora. We at Aurora Aviation take pride in keeping the cost of flight training as low as possible for the new student and advanced student alike while providing professional certified instructors and well maintained aircraft. Our instructor staff is available 7 days a week to help make scheduling easier for you.

Aurora Aviation is also an FAA certified Lasergrade testing center. Your written exams for all levels of flight training can be taken at our facility without need for travel.

After you receive your license, Aurora Aviation will continue to be of service by providing well maintained 2 or 4 place aircraft for you to rent for an hourly rate or for that getaway weekend with the family or special someone.

We also provide fulltime FAA Certified Airframe and Powerplant Mechanics should you decide to purchase your own aircraft after obtaining your license. We can help with all your maintenance needs or questions.

Please accept our offer for an introductory flight lesson, stop by or give us a call at 417-678-3000 or 888-745-1221 to schedule it today.

*The following is an estimated cost breakdown for obtaining a Private Pilot Certificate to operate a single engine, land based aircraft. This is meant to be used for informational purposes only and reflects the expenses that you will most likely incur during your training process.*

*Every person learns at a different pace, some will be able to train more often, and others may not have as much time for practice and study. As a general rule, the more frequently you take lessons, the sooner and less costly your license will be.*

• STUDY MATERIAL / POH	-	160.90
• FAA PHYSICAL EXAM	-	75.00
• 50 HRS C172 (BLOCK RATE) **	-	4450.00
• 35 HRS PRIMARY INSTRUCTION	-	1050.00
• 12 HRS GROUND INSTRUCTION	-	240.00
• FAA WRITTEN TEST	-	100.00
• FAA ORAL/PRACTICAL TEST	-	250.00
		<hr/> <hr/>
• TOTAL ESTIMATED COST	=	6325.90

\* PLEASE ASK US ABOUT AVAILABLE PAYMENT OPTIONS \*

\*\* (Block Rate is the purchase of 10 hours of aircraft time for a reduced rate)
